## General E-Commerce:

General E-Commerce is when businesses sell a variety of products online, like clothes, interiors, electronics, or groceries, on websites or apps.

## Primary Purpose of general e-commerce:

The main goal of general e-commerce is to create an online space where businesses can sell to people all over the world. It makes buying and selling easy by allowing customers to shop whenever and wherever they want. For businesses, it helps reach more customers and grow their sales.

## Step 2:

## What problem does your marketplace aim to solve?

1. Problem: Finding stylish and unique furniture is difficult

Solution: Your website offers a wide range of modern, customizable furniture and interior design items, making it easy for customers to find pieces that match their style without going to multiple stores.

2. Problem: Furniture doesn't always fit perfectly in specific spaces

Solution: Provide tools like virtual room design and expert advice to help customers choose furniture that fits their space and style perfectly.

3. Problem: Delivery and setup can be stressful

Solution: Your website ensures a smooth experience with fast delivery and easy setup services, so customers can enjoy their new furniture without any hassle.

## Target Audience:

Our interior design and furniture e-commerce website targets:

Homeowners and Renters: Individuals looking to upgrade or personalize their living spaces with stylish and functional furniture.

Interior Designers: Professionals seeking premium and customizable furniture for their clients' projects.

Young Professionals and Urban Families: People in urban areas who value convenience, modern design, and seamless delivery and setup.

Small Business Owners: Entrepreneurs furnishing their offices, cafes, or boutique spaces with unique and functional pieces.

Our focus is on providing high-quality, customizable, and easily accessible solutions for anyone looking to enhance their spaces.

Easy Answer

Target Audience:

People who want to decorate their homes: Like homeowners or renters looking for stylish furniture.

Interior designers: Who need great furniture for their clients' spaces.

Busy families and professionals: Living in cities who want modern furniture delivered easily.

Small business owners: Like café or shop owners who need unique furniture for their spaces.

Professional Answer

## What Sets Our Marketplace Apart:

Customization: Customers can personalize furniture by choosing dimensions, colors, materials, and finishes to suit their specific needs and style preferences.

Seamless Experience: Our platform offers virtual room design tools and expert consultations, ensuring that customers make informed choices that fit their space perfectly.

High-Quality, Affordable Pricing: We provide premium furniture and décor at competitive prices, delivering excellent value for money.

Convenient Delivery and Setup: Fast delivery and professional installation services make the process stress-free for customers.

Eco-Friendly Options: We offer sustainable furniture choices for environmentally conscious customers, giving us an edge over competitors.

Easy Answer

What Makes Us Different:

Personalized Furniture: You can customize furniture to match your style and space, choosing sizes, colors, and materials.

Helpful Tools and Experts: Our website has tools to help you plan your room and expert advice if you need it.

Great Quality at Good Prices: We sell high-quality furniture that's affordable and worth the money.

Fast and Easy Delivery: We deliver your furniture quickly and even help set it up for you.

Eco-Friendly Choices: We have furniture options that are better for the planet, which makes us unique.

## Step 3: Create a Data Schema for an Interior Design and Furniture E-Commerce Website

Entities in the Marketplace:

Here's a list of key entities that interact within your marketplace:

1. Products

Represents furniture and décor items available for sale or customization.

Attributes:

Product ID

Name

Category (e.g., sofa, bed, rug)

Description

Price

Dimensions

Material

Customization Options

Stock Quantity

Images

2. Customers

Represents individuals or businesses buying products or using services.

Attributes:

Customer ID

Name

Email

Phone Number

Address

Wishlist

Order History

3. Orders

Tracks transactions between customers and the platform.

Attributes:

Order ID

Customer ID (linked to the Customers entity)

Product IDs (linked to the Products entity)

Total Price

Order Date

Payment Status

Delivery Status

4. Payments

Tracks payments made for orders.

Attributes:

Payment ID

Order ID (linked to Orders entity)

Amount Paid

Payment Method (e.g., card, PayPal)

Payment Status (e.g., pending, completed)

Transaction Date

5. Shipment

Manages the delivery process of items.

Attributes:

Shipment ID

Order ID (linked to Orders entity)

Tracking Number

Delivery Zone (linked to Delivery Zones entity)

Shipment Status (e.g., in transit, delivered)

Estimated Delivery Date

## 6. Delivery Zones

Defines areas covered by delivery services.

Attributes:

Zone ID

Zone Name (e.g., city or region)

Shipping Charges

Estimated Delivery Time

## 7. Reviews (Optional but beneficial)

Allows customers to leave feedback on products.

Attributes:

Review ID

Customer ID (linked to Customers entity)

Product ID (linked to Products entity)

Rating (e.g., 1-5 stars)

Comment

Review Date

## 8. Admins

Represents platform administrators managing products, orders, and customers.
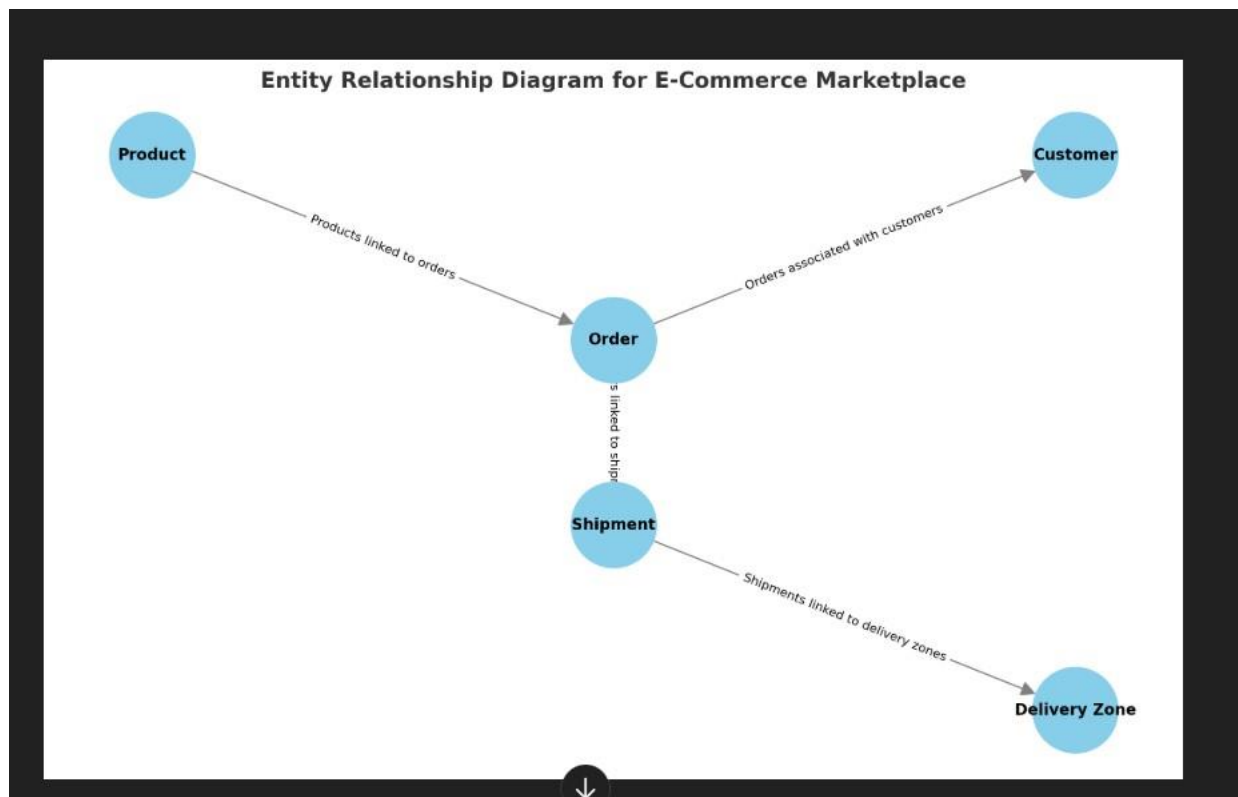

Attributes:

Admin ID

Name

Email

Role (e.g., product manager, support)

**Entity diagram :**

Entity Relationship Diagram for E-Commerce Marketplace

Product is linked to Order, showing that products are part of orders.

Order connects to Customer, representing that orders are placed by customers.

Order also links to Shipment, which tracks the delivery process.

Shipment is connected to Delivery Zone, indicating the areas covered for delivery.

**Key Fields for Each Entity in the E-Commerce Marketplace**

## 1. Products

ID: A unique identifier for each product (e.g., "PRD001").

Name: The product's name (e.g., "Modern Sofa").

Price: The cost per unit (e.g., $299.99).

Stock: The quantity available in inventory.

Category: Product classification (e.g., "Furniture," "Décor").

Tags: Keywords to help with search and filtering (e.g., "New Arrival," "Best Seller").

## 2. Orders

Order ID: A unique identifier for the order (e.g., "ORD12345").

Customer Info: Includes the customer's name, contact details, and delivery address.

Product Details: List of products in the order with their quantities and prices.

Status: Current order status (e.g., "Pending," "Shipped," "Delivered").

Timestamp: The date and time when the order was placed.

## 3. Customers

Customer ID: A unique identifier for each customer (e.g., "CUST001").

Name: The full name of the customer (e.g., "John Doe").

Contact Info: Phone number and email address (e.g., "+1234567890," "john.doe@example.com").

Address: The customer's delivery address (e.g., "123 Main Street, City").

Order History: A record of all past orders placed by the customer.

## 4. Delivery Zones

Zone Name: The name or identifier for the delivery zone (e.g., "Zone A").

Coverage Area: List of cities, regions, or postal codes the zone serves (e.g., "Downtown Area, ZIP 12345").

Assigned Drivers: Information about drivers or couriers assigned to this zone.

5. Shipment

Shipment ID: A unique tracking identifier for each shipment (e.g., "SHIP001").

Order ID: The ID of the order being shipped.

Status: The current shipping status (e.g., "In Transit," "Delivered").

Delivery Date: The expected or actual delivery date for the shipment (e.g., "2025-01-20").
